Mr. Keith James  
PO 205  
Milford, UT 84751

Dear Keith:                      Re:   Milford Distribution System

Enclosed is the proposed letter to be sent to all the water users in the Milford Area Distribution System concerning water meters and the pitot tube alternative. I apologize that it is reaching you much later than I had hoped. Because it will be getting to the water users later than we had discussed, I have changed some of the deadlines that we had decided on in our meeting on February 10. Please let me know if you think these new deadlines will cause any problems.

There have been several changes since the state engineer sent the first water meter notice to the water users in 1992. After discussing the changes with John Mabey, one of the assistant Attorney Generals, we decided that for legal purposes it would be wise to send out an Amended Notice to the water users. This Amended Notice is enclosed for your review. To some extent we are starting over in the enforcement process, however, the well location mapping we did last year will help us to follow up on non-compliance more quickly than we could before.

Please review the letters as soon as possible and let me know if you have any concerns or if anything needs to be added. Please call me if you have any questions.

Sincerely,

A handwritten signature in cursive script, appearing to read 'Lee H. Sim'.

Lee H. Sim, P.E.  
Assistant State Engineer  
for Distribution
